

“Wood has been an enduring companion to human civilisation. From its earliest role in shaping tools and shelter to its timeless presence in contemporary design, wood continues to define the way we experience space.”

Fabwood is a reputed name in the lumber industry, with nearly three decades of experience. Led by a dynamic, and enterprising team, the company brings together deep industry expertise and innovative thinking. We are a company that goes beyond understanding quality and aesthetics. By introducing new products and applications, we help set emerging trends and enable designers and consumers to bring their creative visions to life.

Join us on our exciting journey as we continue to create and help create beautiful, timeless spaces.

FINGER JOINTED BOARDS

Made from kiln-dried wood, finger-jointed boards are formed using precision engineered interlocking profiles. The joints are edge-glued, cold-pressed, and meticulously sanded to achieve a seamless finish. This advanced joinery enhances strength and delivers superior dimensional stability without compromising the natural integrity of the wood.

Rooted in timber, we now offer a curated range of doors and door frames. Our collection includes moulded, lamella, laminated, and veneer doors, designed to balance construction integrity with surface quality—suited for both modern and traditional interiors.

L A M I N A T E D V E N E E R L U M B E R (L V L)

- Laminated Veneer Lumber is made when thin wood veneers are bonded with adhesives under heat and pressure, with grains running parallel for high strength. This material is used in places where structural integrity is crucial. It is used in structural components like beams, headers, studs, and frames. Engineered for structural performance, making it a viable alternative to solid timber.

LIVE EDGE WOODEN TABLE

Reinforcing our philosophy of “Innovation”, we strive to give old and naturally uprooted trees a new home by crafting naturally stunning tabletops out of their trunks. The live edges give them a more raw and authentic look that fits perfectly into both rustic and more modern spaces.

VENEER EDGE BAND

Veneer edge banding is crafted from thin slices of various natural wood .

Designed to finish and protect exposed panel edges, it delivers a seamless solid-wood appearance while enhancing durability and concealing core materials for a clean, refined finish.

STAIRCASE TREADS

Wooden Staircase Treads are manufactured from solid or engineered wood, precision-machined for strength, stability, and uniform thickness. Designed to withstand continuous foot traffic, they provide a durable and reliable walking surface while preserving the natural warmth of wood. Used in residential and commercial staircases, they are available in multiple wood species and finishes, making them suitable for both modern and traditional interiors.

CLADDING PRODUCTS

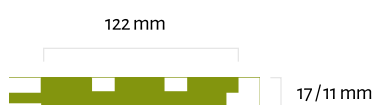

The design freedom offered by wooden cladding is truly unmatched. It integrates seamlessly into any environment or architectural style, bringing warmth, character, and elegance. Timber's natural resilience and excellent strength-to-weight ratio allow it to withstand significantly higher stresses and movement, ensuring durability over time. The result is a long-lasting, contemporary finish that transforms your space exactly the way you envision it.

Available in 17mm and 11mm
